Yongjung Kim | CV

Korea Astronomy and Space Science Institute – Daejeon, Korea
+82 (010) 6892 0502 • ☎ (042) 865 2017 • ✉ yongjungkim@kasi.re.kr
Last updated: July 3, 2024

Positions

Senior Researcher — **Daejeon, Korea**
Korea Astronomy and Space Science Institute (KASI) — *2023.07 – present*
Space Astronomy Group (PI: Dr. Woong-Seob Jeong)

Sejong Science Fellow — **Daegu, Korea**
Kyungpook National University, continued at KASI — *2021.09 – present*
Advisor: Prof. Minjin Kim

KIAA Fellow — **Beijing, China**
Kavli Institute for Astronomy and Astrophysics at Peking University — *2019.11 – 2021.09*
Advisor: Prof. Linhua Jiang

Postdoctoral Fellow — **Seoul, Korea**
Research Institute for Basic Sciences at Seoul National University — *2019.09 – 2019.10*
Advisor: Prof. Myungshin Im

Education

Seoul National University — **Seoul, Korea**
Ph.D. in Astronomy — *2013.03 – 2019.08*
Thesis title: Survey of Faint Quasars at High Redshifts
Supervisor: Prof. Myungshin Im

Seoul National University — **Seoul, Korea**
B.S. in Astronomy — *2009.03 – 2013.02*
Minor: Physics

Research Interests

Observational Cosmology with Quasars

- High-redshift Quasar Survey with Infrared Medium-deep Survey (IMS)
- Contribution of faint quasars to the cosmic reionization and ionizing backgrounds
- Growth of the supermassive black holes with their host galaxies at various redshifts
- Demography of quasars along the cosmic time
- Multi-wavelength surveys (participating in IMS, DESI, CSST & SPHEREx)

Research Grants

The Sejong Science Fellowship
Funded by National Research Foundation of Korea ($420,000) — *2021-2026*
Subject: Cosmic Evolution of Quasar-Galaxy by developing an Integrated Analysis Model for the Observational Big Data

The 2020 China Postdoc Science Special Grant
Funded by China Postdoctoral Science Foundation ($26,000) — *2020*
Subject: Quasar and Host Galaxy Properties with the Newest Large Survey Data

The 2020 China Postdoc Science General Grant
Funded by China Postdoctoral Science Foundation ($12,000) — *2020*
Subject: Quasar and Host Galaxy Properties with the Newest Large Survey Data

Top 100 Fellowship
Postdoc International Exchange Program at PKU (*$7,000*) *2019*
Subject: Enhanced Studies on High-redshift Quasars

Honors and Awards

Scholarship for Creative Academic Performance
Brain Korea 21 Program for Leading Universities and Students as a BK fellow (*$ 58,000*) *2013 – 2019*
awarded by National Research Foundation of Korea

Academic Excellence Scholarship
Partial tuition scholarship (*$2,000*) *2014, 2015*
awarded by Seoul National University

SNU in Global Research Awards
2nd place *2013*
awarded by Office of International Affairs at Seoul National University

Best Poster Presentation Awards at the 2012 Fall KAS Meeting
1st place *2012*
awarded by Korean Astronomical Society

Lotte Scholarship
Full tuition scholarship (*$5,000*) *2012*
awarded by Lotte Foundation

Presidential Science Scholarship
Full tuition scholarship (*$10,000*) *2009 – 2010*
awarded by National Research Foundation of Korea

Observational Experience

Classical/Remote Observations

BOAO 1.8 m Telescope **Bohyunsan Optical Astronomy Observatory**
Longslit Spectrograph
2023 January 27-31 (5 nights)

Palomar 200 inch Telescope **Palomar Observatory**
DBSP (*Remote*) (*Telescope Access Program*)
2 nights in 2020B, 2 nights in 2021A

Magellan Baade 6.5 m Telescope **Las Campanas Observatory**
IMACS & FIRE
2015 January 18-19, September 11-13; 2016 December 3-5; 2018 September 9-10 (10 nights)

Otto Struve 2.1 m Telescope **McDonald Observatory**
SQUEAN & CQUEAN
2014 June 3-8, November 3-9; 2015 June 19-28; 2016 July 25-28; 2017 February 1-11, April 19-26, September 16-24, December 26-31; 2018 April 16-25; 2019 February 5-14 (81 nights)

Maidanak 1.5 m Telescope **Maidanak Observatory**
SNUCAM
2013 August 2-7 (6 nights)

Observations awarded as PI

James Clerk Maxwell Telescope **East Asian Observatory**
SCUBA-2
9.00 hr in 2018A

Gemini 8 m Telescopes **Gemini Observatory**
GMOS-N, GMOS-S, & FLAMINGOS-2 (*K-GMT Science Program*)
9.00 hr in 2016B; 13.00 hr in 2017B; 7.92 hr in 2018A; 14.00 hr in 2018B; 10.14 hr in 2019A; 6.9 hr in 2020A

Atacama Large Millimeter/submillimeter Array
12m Arrays
3.6 hr in Cycle 4; 2.6 hr in Cycle 5

Observations awarded as Co-PI

Gemini 8 m Telescope **Gemini Observatory**
GMOS-S (*K-GMT Science Program*)
1 night in 2015A; 6.70 hr in 2016A; 24.00 hr in 2017A (for thesis; PI: Myungshin Im)

Outreach and Other Experiences

TAC of K-GMT Program
Gemini-2023B, 2024A, and 2024B *2023-*

KIAA-DoA Seminar Committee
Organizing seminar talks at KIAA & DoA at PKU *2021*

PKU Lunch Talk Committee
Organizing lunch talks at PKU *2020*

Technical Research Personnel
Serving duty on Korean military service *2016 – 2019*

Lecturer for International Astronomy Olympiad (IAO) students in Korea
Subject: Basic and Application of Observational Astronomy *2017*

Teaching assistant & lecturer for undergraduate class
Astronomical Observation and Lab (1 semester); Astronomy Lab (1 year) *2013 – 2014*

Undergraduate internship
Center for the Exploration of the Origin of the Universe (CEOU) at SNU *2012 – 2013*
Subject: The Red Objects in the GRB 100205A Field
Supervisor: Prof. Myungshin Im

Computer Skills

Programming: IDL (fluent), Python (fluent), R (basic)

Data Analysis: IRAF, SExtractor, SWarp, SCAMP, CASA, Galfit, TOPCAT, etc.

Others: LaTeX, Microsoft Office, Adobe Photoshop, etc.

Conferences

Invited Talks

- *"Hunting for Faint High-redshift Quasars with Infrared Medium-deep Survey"*, K-GMT Science Program Users Meeting 2020, On-line, 2020, November 19-20.
- *"Discoveries and Properties of High-redshift Quasars with IMS"*, Science and Evolution of Gemini Observatory 2018, San Francisco (USA), 2018, July 22-26.

Selected Talks

- *"Searching for High-z Faint Quasars with IMS"*, Gemini Observatory Science Meeting 2022, Seoul (Korea), 2022, July 26-29.
- *"Quasar Luminosity Function at $z \sim 5$ with IMS"*, Summer All Zoom Epoch of Reionization Astronomy Conference (SAZERAC), On-line, 2020, July 6-9.
- *"High Star Formation Rates of Low Eddington Ratio Quasars at $z \gtrsim 6$"*, Cosmic Evolution of Quasars: from the First Light to Local Relics, Beijing (China), 2019, October 21-25.
- *"IMS J2204+0112, a Low Eddington Ratio in the Epoch of Reionization"*, Extremely Big Eyes on the Early Universe at Kavli IPMU, Tokyo (Japan), 2019, March 25-29.
- *"The Low Eddington Ratio of IMS J2204+0112, a Faint Quasar at $z \sim 6$"*, Extremely Big Eyes on the Early Universe at UCLA, Los Angeles (USA), 2019, January 28 - February 1.
- *"Discovery and Properties of IMS J2204+0112, a Faint Quasar with Low Eddington Ratio at z∼6"*, K-GMT Science Program Users Meeting 2018, Daejeon (Korea), 2018, February 26-27.
- *"High-z Quasar Survey with IMS: Are Quasars Growing Fast in the Early Universe?"*, East-Asia AGN Workshop 2017, Kagoshima (Japan), December 4-6.
